

Schweizer KI

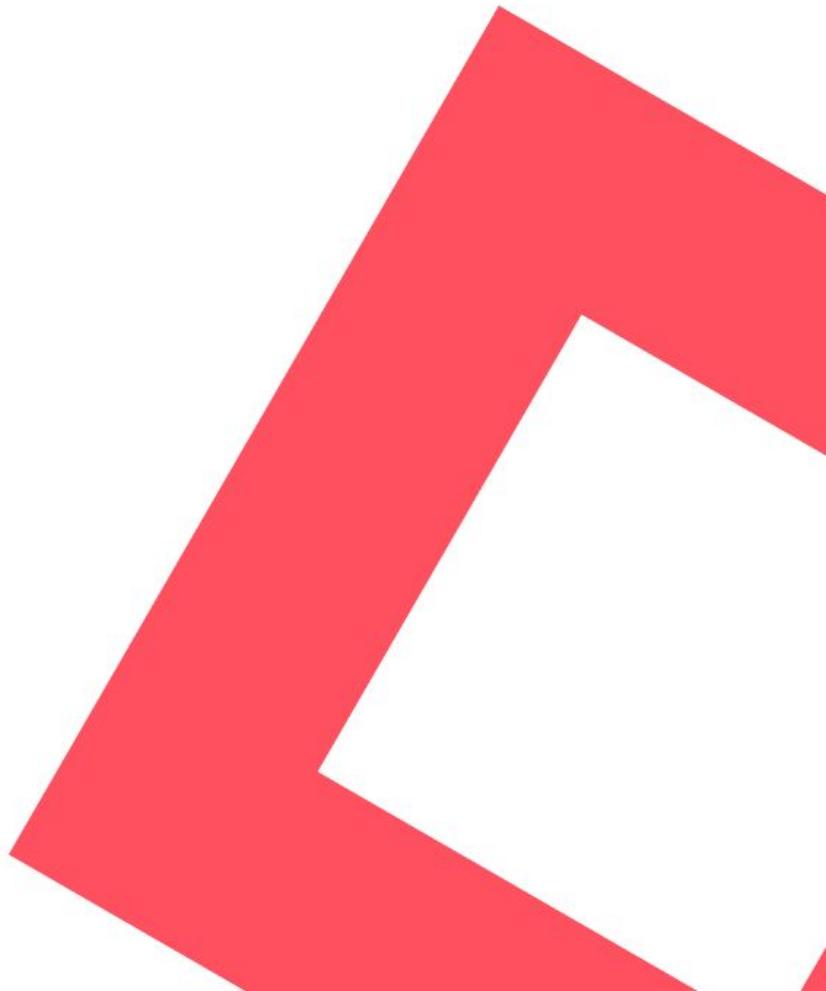

Sicher, bezahlbar &
ressourcenbewusst

Fabio Duo

OneGov

OneGov.ch

Es ist nicht nötig, sich für ein bestimmtes LLM oder eine Firma zu entscheiden; stattdessen brauchen wir eine Plattform, die Nutzern die Kontrolle über ihre eigenen Ressourcen ermöglicht.

**Hier kommt
PeakPrivacy
ins Spiel.**

Deine Schweizer KI-Plattform.

Die Gesichter hinter PeakPrivacy: Freihandlabor

We bring your solutions to life

- Gegründet 2009 in Zürich
- 16 Teammitglieder
- Geschäftsführer Fabio Duó
- Ausgewählte Kunden:

«Organisationen werden nicht scheitern, wegen der Qualität oder der Leistung ihrer KI-Integration.»

Sondern weil sie nie einen **individualisierten und verlässlichen Prozess** installiert haben, Künstliche Intelligenz sinnvoll zu nutzen.

Warum PeakPrivacy

- Open-Source-Modelle effizient und ressourcenschonend nutzen
- Betreibung der Modelle durch Freihandlabor
- 100% datensicheres Hosting in der Schweiz
- Entwicklung von intuitiven User Interfaces
- Custom Integrations und Support
- Basis für künftige LLM-Upgrades

Effizient & sicher

Kosteneffiziente KI-Lösungen:

- Nutzung modernster Open-Source Technologie
- optimierte Leistung bei geringen Kosten
- flexible Anpassung an Deine Bedürfnisse

Datensicherer Betrieb in der Schweiz:

- Schweizer Hosting garantiert höchste Datensicherheit
- kontinuierliche Wartung & Updates durch Freihandlabor

The world moves fast!

**Mit PeakPrivacy brauchst Du NICHT
28 verschiedene AI-Tools!**

**Du erwirbst mit EINEM Tool
die Fähigkeit 80% aller
«KI-Startups» selbstständig zu
entwickeln und zu realisieren.
Für Deine Use cases.**

Hands-on!

PeakPrivacy Chat

Mitarbeitende nutzen KI mit (oder ohne) Firmendaten
sicher und kontrolliert an einem Ort.

**Wähle Dein LLM aufgrund Deiner
Datenschutz-Präferenzen und Deinem
Use case aus.**

**PeakPrivacy beinhaltet die führenden
US-Modelle, Open Source Modelle & das
allererste in der Schweiz gehostete DeepSeek**

Of course, I can help you with that. Let's break it down into smaller steps.

When you find yourself procrastinating the most? Is it during specific tasks, certain challenges?

It's most common when I have a big project to work on, especially if it's something I'm not particularly interested in or don't feel confident about.

When you feel overwhelmed, it's natural to want to delay it. One effective strategy is to break it down into smaller, manageable steps. Instead of thinking about the entire project, focus on completing one small step at a time.

Data Utilization for GPT Models Based on Server Locations

We offer a variety of GPT models tailored to meet different data security needs for individuals and businesses.

With server options in Switzerland, the EU, and the USA, we provide five distinct levels of data protection to align with your specific risk tolerance and security requirements.

Swiss servers

Level 1

AI model hosted in Switzerland
No data leaves Switzerland
No data leaves the company
No data is anonymized because it is for internal use only
No training of the AI model
No logging of user actions

Level 2

AI model hosted in Switzerland
No data leaves Switzerland
All data is anonymized
No training of the AI model
No logging of user actions

EU servers

Level 3

AI model hosted in the EU
No data leaves the EU
All data is anonymized
No training of the AI model
No logging of user actions

US servers

Level 4*

AI model hosted in the US
All data leaves the EU
All data is anonymized
Training of the AI model cannot be excluded
Logging of user actions cannot be excluded

Level 5**

AI model hosted in the US
All data leaves the EU
Training of the AI model cannot be excluded
Logging of user actions cannot be excluded

This section lets you view, add, and customize LLM models, or create your own **Constructors** for specific tasks by adjusting settings and adding tools or prompts to the standard models.

Constructors

Standard models

Customer Support

A constructor designed for handling customer queries with quick, accurate, and polite responses, tailored for customer service applications.

Content Creator

A constructor optimized for generating creative and engaging content, suitable for blogs, social media posts, and marketing materials.

Data Analyzer

A constructor focused on interpreting and summarizing data, ideal for generating insights and reports from structured data sources.

Tech Assistant

A constructor built for providing technical support and troubleshooting, perfect for IT help desks and tech support roles.

Legal Draft

A constructor tailored for drafting legal files and providing legal advice, designed to assist in legal research and writing tasks.

Task Management

Hey, I've been thinking quite a lot lately about my personal finances. I feel like I'm doing okay overall, but I'm wondering if there's anything important that I might be missing.

deepseek/deepseek-r1 8:11 PM

That's great you're reflecting on your financial situation! It's always valuable to periodically assess your financial health and make improvements where you can. Are there any particular areas you're concerned about or that you'd like to focus on?
